

1) Enter your back office <https://bc.businessprocess.biz/en>

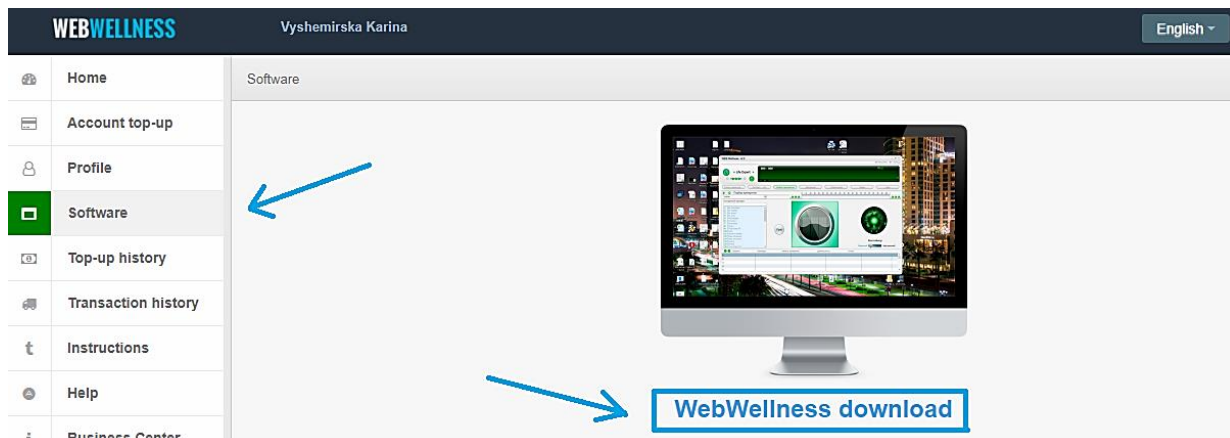

2) Enter “WebWellness office”

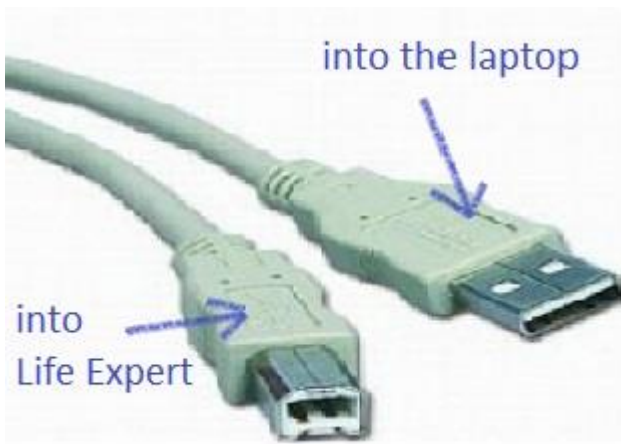

If you don't have this option, go to the profile and put the phone number for “WebWellness office”

3) Go to the “Software” section and download the program on your laptop.

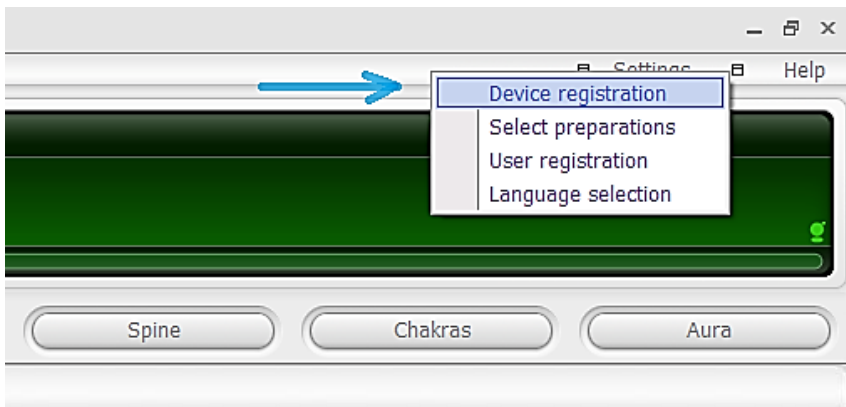

4) Connect the **"LifeExpert"** via the USB cable to the laptop and turn on the device.

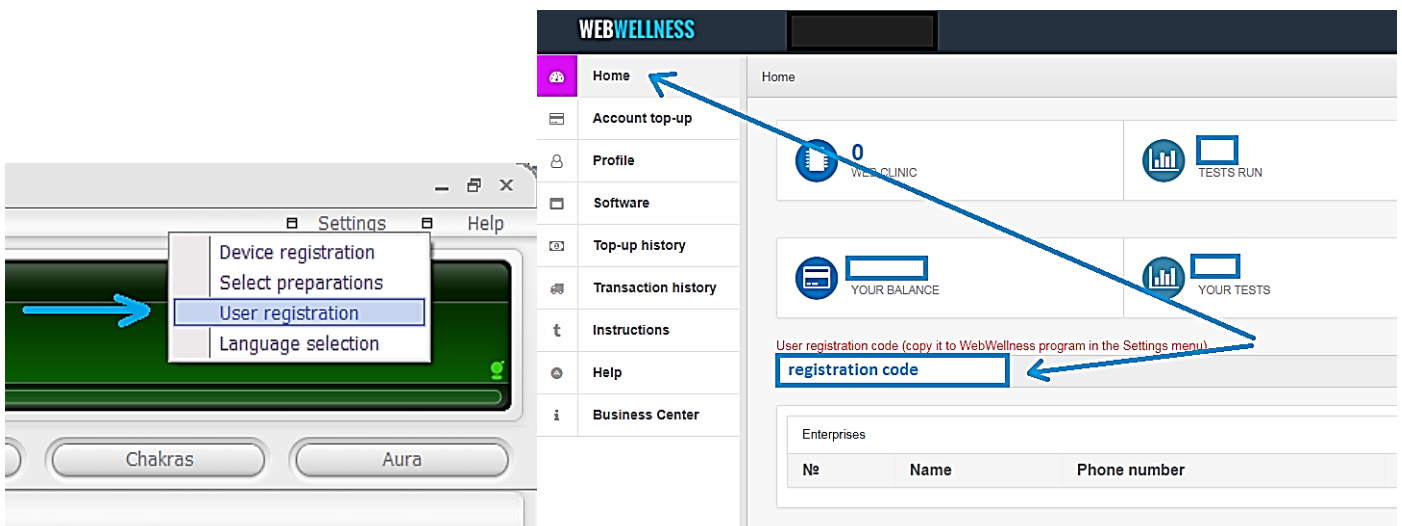

5) Open the installed **"Web\_Clinic"** program through the shortcut on your desktop.

6) In the upper right corner click **"Settings"** and select **"Device Registration"**, enter the registration number which is 11 11 11 11 (the computer must be connected to the Internet).

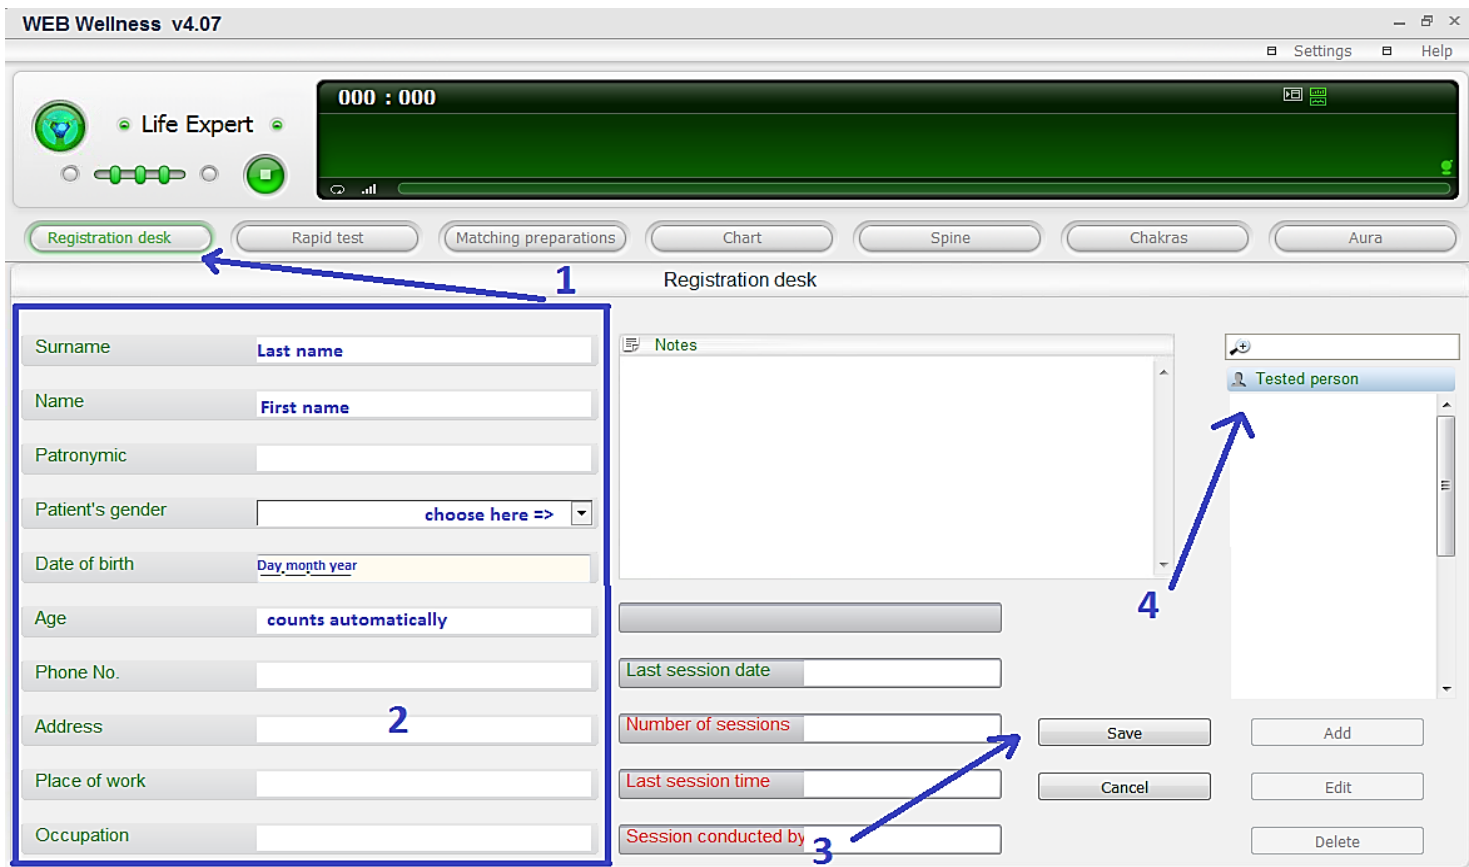

7) After that choose **"User registration"** from the home page of your **"WebWellness office"**

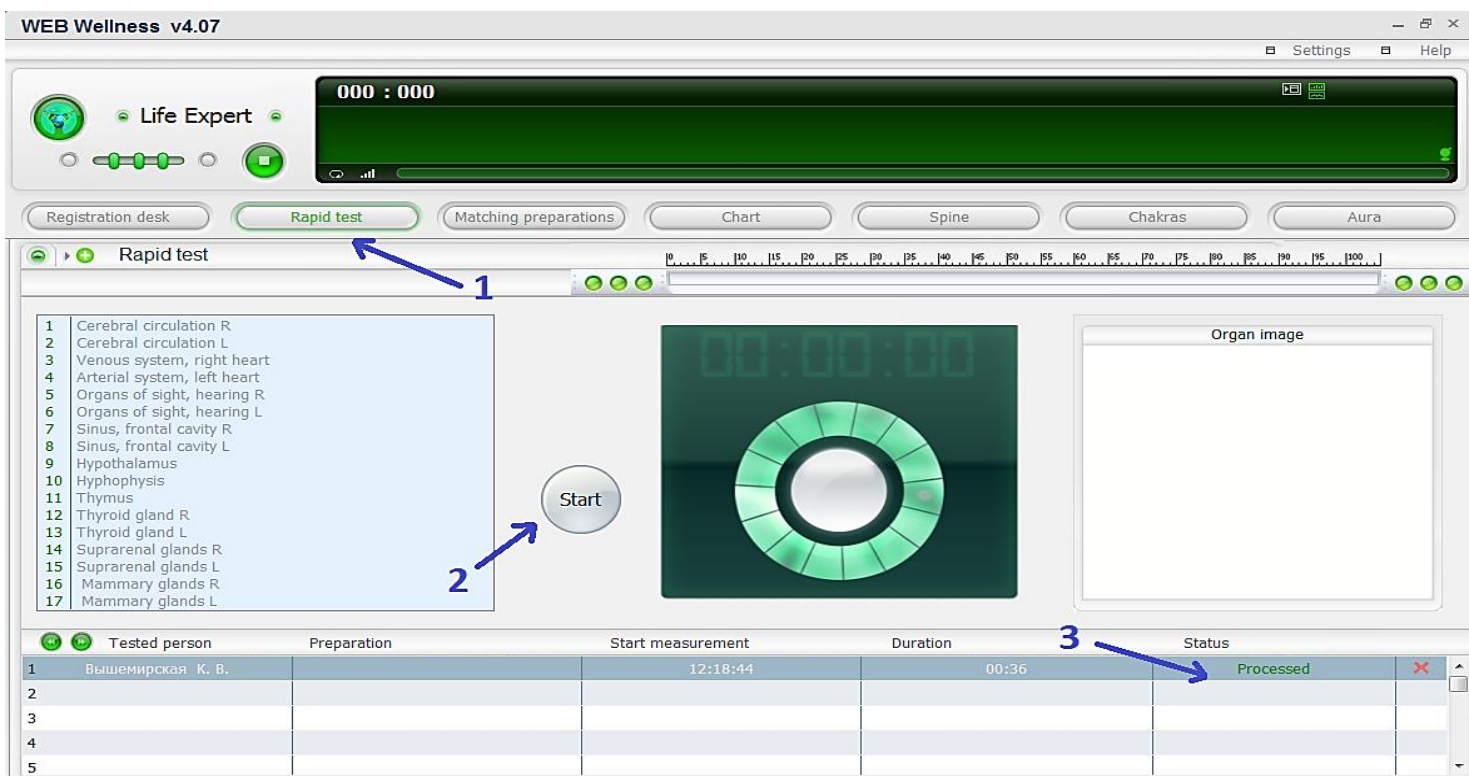

8) After registration we can start doing tests. All these steps (1-7) should be done only once, you don't have to register a user or a code every time you use the device.

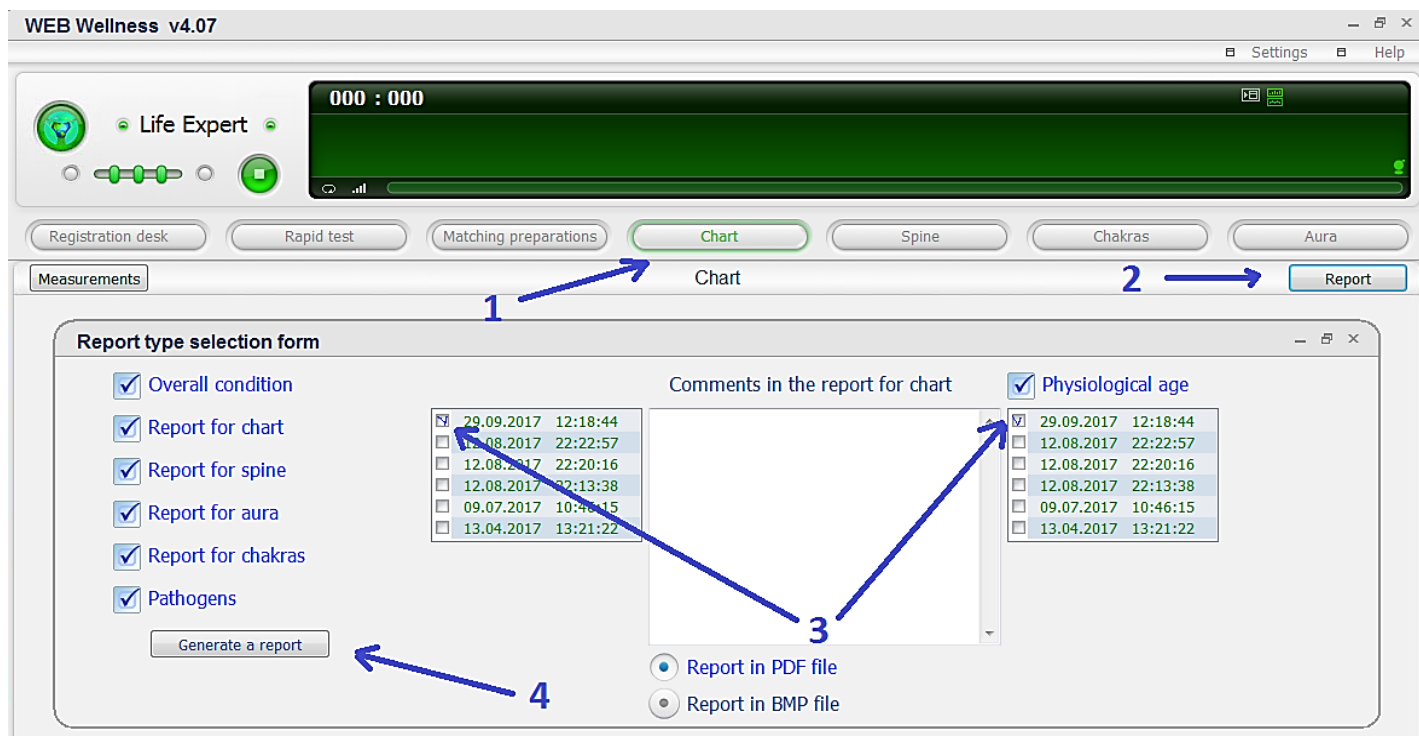

9) Choose **“Registration desk”** and fill in user's information (last name, first name, choose gender, and date of birth – day/month/year), press save and in the right side choose a user.

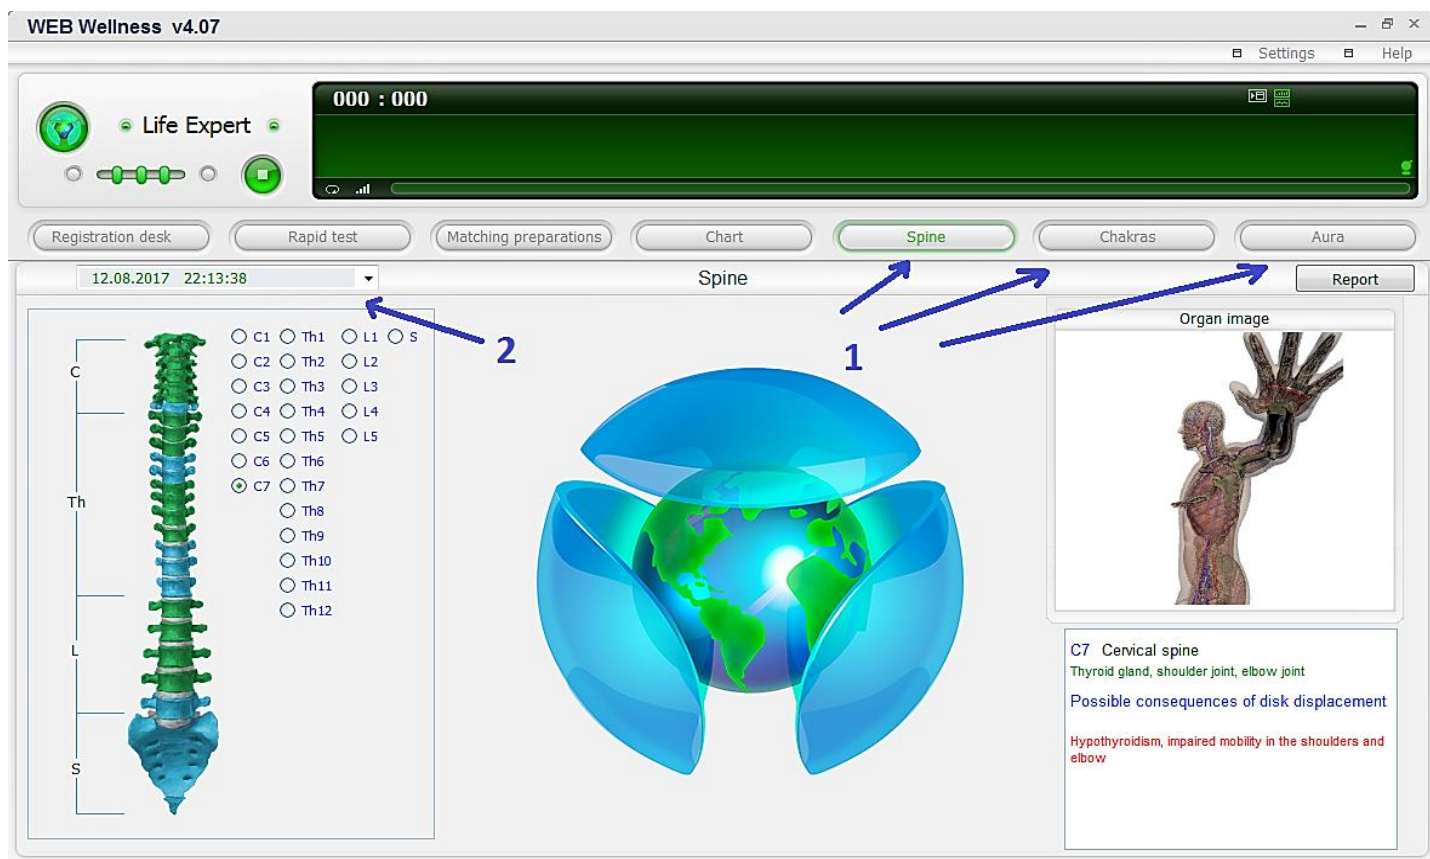

10) Choose **“Rapid test”** section and once all the electrodes are connected press **“Start”**. Send test for processing by pressing at the status **“Unprocessed”** with the left side of your laptop's touchpad or mouse. It takes a few seconds for the test to be **“Processed”**.

11) On the "Chart" tab we generate a diagnostic report, it will automatically appear on the desktop in a file called **LReport.pdf**. Choose 1 or 2 (to compare) dates for the measurements and only 1 for **Physiological age**. Show it to the user and send it to the mail if needed. (Each new diagnostics overwrites this file, so rename it if you want to save the data).

12) To show interactive test on the tabs "Spine", "Chakras" and "Aura" we select in the pop-up menu the latest diagnostics and we point the mouse or a touchpad at the graphical diagnostic displays.

By pressing and pointing to different sides we can see organs and systems information.

13) To get an individual automatic complex due to the test results, you need to connect the **“Life Balance”** device to your computer and wait a little bit until the program recognizes the device. Before connecting the device you need to press and hold the **“Power”** button until you make sure that **“Life Balance”** is off.

14) If the laptop doesn't see the device it is necessary to install a driver for the device. The driver is located in the section where you downloaded the program for the **“LifeExpert”** (**WebWellness office =>Software**).

A screenshot of the WebWellness website. The top navigation bar includes the 'WEBWELLNESS' logo, a search bar, and a language dropdown set to 'English'. A left sidebar contains a menu with items: Home, Account top-up, Profile, Software, Top-up history, Transaction history, Instructions, Help, and Business Center. The 'Software' item is highlighted with a green box and a blue arrow. The main content area is titled 'Software' and contains several FAQ entries. The first entry is 'Question: A report cannot be generated.' with an answer about installing a PDF viewer. The second entry is 'Question: A report ceased to be generated.' with an answer about closing reports. The third entry is 'Question: My computer cannot identify the Life Balance device.' with an answer about installing a virtual COM port driver. A blue arrow labeled '1' points to the 'Software' menu item, and another blue arrow labeled '2' points to the link in the third FAQ entry: [http://businessprocess.biz/files\\_for\\_company/Virtual%20COM%20Port%20Driver.zip](http://businessprocess.biz/files_for_company/Virtual%20COM%20Port%20Driver.zip). At the bottom, a browser window shows the 'Справка' (Help) page.

In the software section you can find FAQ and more information about downloading.
